Amend The Soil Profile While Aerifying

Drill & Fill[®] Mfg.

Specialty Aerification Equipment

Benefits of Drill and Drill & Fill Aerification

Drill and Fill is accepted world-wide as the proven method to modify the rootzone without total renovation and while keeping the turf in play. Whether the problem is compaction and poor drainage or accumulated layering, the result of **Drill and Fill** aerification is improved turf quality. **Drill and Fill** is a valuable tool in your regular turf management program.

Drill aerification is effective in reducing "iron layer" problems. Deep drilling to a maximum depth of 18" breaks through the layer and greatly improves drainage.

Drill and Fill Aerification

- Fastest Backfill Aerator
- No "Walking" or "Uplifting"
- Backfill up to 12" deep
- Less stress on Fragile Roots
- Gently penetrates hardest soils
- Increases root depth
- Resume Play IMMEDIATELY
- Great fix for old and new greens
- Up to 4 "sets" of holes with no repeats

Drill Aerification

- Penetrates hard soils
- Increases root depth
- No material left on green
- Allows greens to disperse air
- Resume play IMMEDIATELY
